modern psychology is at an impasse as it searches anxiously for new therapies to address the increasing occurrence of mental illness in contemporary society in this groundbreaking anthology leading authors from the perennialist school including huston smith seyyed hossein nasr and frithjof schuon draw on the age old insights of the world's wisdom traditions to argue that modern psychology behaviorism psychoanalysis humanistic and transpersonal

psychology overlooks the specifically spiritual factors contributing to mental health and illness

this book constitutes the refereed proceedings of the 21st international conference on advanced information systems engineering caise 2009 held in amsterdam the netherlands on june 8 12 2009 the 36 papers presented in this book together with 6 keynote papers were carefully reviewed and selected from 230 submissions the topics covered are model driven engineering conceptual modeling quality and data integration goal oriented requirements engineering requirements and architecture service orientation service orchestration value driven modeling workflow business process modeling and requirements engineering

human retroviruses hiv and htlv have been recognized as important pathogens because of their association with lethal diseases such as aids and atl considerable resources and efforts have been directed at understanding the interaction between these retroviruses and their host which may provide clues as to how the infection can be controlled or prevented among the key scientific successes is the identification of intracellular restriction factors that have evolved as obstacles to the replication of pathogens including infectious retroviruses the discovery of apobec which are strong mutagens of retroviral genomes and intracellular retroelements began a new era of intense research activities into the spectrum of intrinsic anti hiv activity leading to the identification of trim5a bst2 tetherin and samhd1 in response hiv has evolved several accessory genes as weaponries to evade these intracellular restriction activities the intracellular antiretroviral defenses evolved in response to endogenous retroelements that make up more than 40 of the entire mammalian genome and which are regarded as ancestors of infectious retroviruses ltr type retroelements are present in all higher eukaryotes representing about 8 of the human genome non ltr retroelements can be found at extremely high copy numbers also with a significant portion of mammalin genomes consisting of lines mammalian genomes are modified by lines through insertions but also by the indirect replication of non autonomous retrotransposons such as sines lines insertion was shown to have played and continue to play important roles in genomic evolution and somatic genome mosaicism mediated physiology and because retrotransposition can confer genetic diversity that is beneficial to the host the vertebrate intrinsic immunity has evolved to support a balance between retroelement insertions that confer beneficial and those that cause deleterious gene disruptions the articles published in this research topic should serve not only as valuable references for the field but provide future topics of research for investigators that should further our understanding of the retrovirus retroelements and their restrictions

this book takes stock of german gender equality in several policy fields after 16 years of

governments led by angela merkel and her conservative christian democratic party cdu while maintaining its status as an economic engine in europe germany has historically been a laggard in adopting gender equality measures the european gender equality index however now ranks germany relatively high and shows substantial progress since 2005 while this has gone mostly unnoticed germany has passed far reaching legislation in major policy fields relevant for gender equality investigating the effects of merkel s tenure on gender equality the chapters in this volume assess policy output and outcomes with a focus on internal power dynamics in germany as well as international and european union eu level pressures in the policy domains of political representation lgbti rights migration the labor market and care it examines how policy measures introduced by conservative governments affect gender norms and gender culture and if they ultimately lead to effective implementation and greater equality the book argues that merkel often led from behind indirectly facilitating claims making instead of proactively pushing them this nonetheless contributed to transformative change in germany by merkel not blocking policy proposals and allowing civil society groups and rival parties to push many progressive gender policies leading from behind gender equality in germany during the merkel era is a fascinating read for students researchers and academics interested in european politics political leadership gender equality and lgbti politics this book was originally published as a special issue of german politics
