sixty years after understanding media marshall mcluhan remains one of the best known and most influential intellectuals of the twentieth century far beyond academia readers and non readers recognize his coinages such as the gutenbergs era the global village and the medium is the message a literary scholar by profession mcluhan was one of the first academics to recognize the new opportunities offered by radio and television to reach audiences beyond the readerships of scholarly journals his talks and appearances ushered in public intellectual debate concerning the electronic age although his reputation waned in the 1970s the recent making available to the public of his extraordinary personal library of some six thousand books enables new kinds of analyses of mcluhan as a reader thinker and cultural force the essays here focus not so much on his media theory per se as on the habits and practices that animated his reading and on the larger questions of what reading

and not reading mean we don't need to agree with everything McLuhan says to make valuable use of his work. New resources offer us an unprecedented opportunity to revisit one fallible human reader whose texts and ideas are good to think with and against. This book was originally published as a special issue of the journal *Textual Practice*.

Against the backdrop of climate change and tectonic political shifts in world politics, this handbook provides an overview of the most crucial geopolitical and security-related issues in the Arctic. It discusses established shareholder policies in the Arctic: those of Russia, Canada, the USA, Denmark, and Norway, as well as the politics and interests of other significant or future stakeholders including China and India. Furthermore, it explains the economic situation and the legal framework that governs the Arctic and the claims that Arctic states have made in order to expand their territories and exclusive economic zones. While illustrating the collaborative approach represented by institutions such as the Arctic Council, which has often been described as an exceptional institution in this region, the contributing authors examine potential resource and power conflicts between Arctic nations due to competing interests. The authors also address topics such as changing alliances between Arctic nations, new sea lanes of communication, technological shifts, and eventually the return to power politics in the area. Written by experts on international security studies and the Arctic, as well as practitioners from government institutions and international organizations, the book provides an invaluable source of information for anyone interested in geopolitical shifts and security issues in the High North.

Canadian literature and medicine breaks new ground by formulating a series of frameworks with which to read and interpret a national literature derived from the very fabric of that literature. In this case, Canadian literature is of particular interest because of its consideration of coloniality, indigeneity, and coincident development alongside a nascent socialized medical system currently under threat from neoliberalism. The first chapters of the book carefully track the development of Canada's socialized medical system as it manifests in the imaginations of the nation's poets and authors, who depict care reciprocal flows are investigated in which these poets and authors are quoted in policy documents. The archive-based methodology is sustained in subsequent chapters that rely upon a unique interdisciplinary mix of medical history, philosophy of medicine, medical policy theory inherent to the field of Canadian literature, focusing in particular on the Garrison mentality as a form of aesthetic protest and the feminist ethics of care and indigenous ways of knowing.

unceded is a compelling history of the bc government's relationship with indigenous peoples from early land question disputes to current reconciliation efforts. treaty commissioner george m abbott combines archival research with a former cabinet minister's insider perspective on government to chronicle over 150 years of bc indigenous relations. he details how early government officials refused to negotiate treaties, instead coercing first nations onto small reserves despite sustained indigenous resistance. the situation only worsened in the decades that followed until several supreme court decisions compelled the province to sit down at the negotiating table. more recently, the province has taken steps toward reconciliation, including passing legislation recognizing indigenous rights. as abbott shows, overcoming the legacy of colonialism is no small task, but achieving justice is worth the effort. unceded will help all british columbiaans understand historical wrongs and the obstacles to righting them.

the humanists of the fifteenth and sixteenth centuries took a passionate interest in Livy's history of Rome. No one studied the text more intensively than the Swiss scholar Henricus Glareanus, who not only held lectures on different Roman historians at the University of Freiburg im Breisgau but also drew up chronological tables for ancient history which were printed several times in Basle. Sometimes together with Livy's history, Glareanus annotated his personal copy of the chronological tables and invited his students to copy his marginal notes into their own copies of the book. Three of these copies survived and give new insight into Glareanus's practices as a scholar and teacher. The notes they contain and the way in which Glareanus used them as a teacher are distinctive and neither has had much attention in the past. From historians of reading, this volume presents facsimile reproductions of the tables from one of the surviving copies now kept in Princeton University Library. The high quality reproductions include transcriptions of the handwritten notes, unlocking Glareanus's teachings for a new generation of students and researchers.
