2 Machine Translation MT

MT has witnessed significant advancements in recent years with neural machine translation NMT leading the charge NMT algorithms produce more humanlike and accurate translations challenging the traditional role of translators

Types of MT

MT can be categorized as Rulebased MT Relies on preprogrammed rules to translate text Statistical MT SMT Uses statistical models based on large datasets of parallel texts Neural MT NMT Utilizes artificial neural networks trained on massive datasets to produce more fluent and accurate translations

Impact on Translators

MT can serve as a valuable tool for translators enabling them to Speed up initial drafts Produce a rough translation as a starting point Identify potential errors Analyze MT output for accuracy and identify areas that require human intervention Enhance productivity Automate repetitive tasks freeing up time for complex and nuanced translations However MT is not a substitute for human translators While it can produce usable translations for certain contexts it lacks the nuance cultural understanding and ethical considerations that human translators bring to the table

3 Other Electronic Tools

In addition to CAT tools and MT translators can utilize a wide range of other tools to enhance their workflow

Language Dictionaries and Lexicons

Online dictionaries and lexicons provide comprehensive definitions synonyms and usage examples aiding in accurate translation

Grammar and Style Checkers

Tools like Grammarly and ProWritingAid identify grammatical errors and style issues improving translation quality

3 Research Tools

Access to online databases academic journals and specialized resources can provide translators with context and accurate information

Discussion of Ethical Considerations

While electronic tools offer numerous benefits it is crucial to address the ethical considerations surrounding their use

Transparency and Disclosure

Translators must be transparent with clients regarding the use of MT and other tools Clients should be informed if MT has been used and the extent of human intervention involved

Quality Assurance

Translators are responsible for ensuring the quality of their work regardless of the tools used Tools can assist in quality control but the ultimate responsibility lies with the translator

Respect for Cultural Nuances

MT and other tools may not always capture the subtleties of language and culture Translators must exercise caution context when using these tools

Data Privacy and Security

Translators should ensure the security of client data and adhere to data protection regulations when using online tools

Fair Compensation

Translators should be fairly compensated for their work regardless of the tools they use Clients should recognize the value of human expertise even when leveraging technology

Conclusion

Electronic tools

are transforming the translation landscape empowering translators to work more efficiently and accurately While MT continues to advance and pose challenges to the traditional role of translators human expertise remains crucial for ensuring cultural sensitivity ethical considerations and nuanced understanding Translators who embrace these tools and integrate them effectively into their workflow thrive in this evolving environment delivering highquality translations that meet the everincreasing demands of a globalized v

Future of Translation The future of translation is likely to be shaped by further advancements in AI and language technology We can expect Improved MT NMT will continue to evolve becoming more accurate and nuanced Hybrid Translation Models Human translators will collaborate with MT leveraging its strengths for speed and efficiency while providing the nuanced understanding and cultural 4 sensitivity that only humans can offer Personalized Translation Experiences Technology will enable tailored translations based on individual preferences and contexts Increased Demand for Human Translators The complexity of language and the need for cultural understanding will continue to drive demand for qualified translators By staying informed about the latest trends and tools transla can position themselves for success in this dynamic and exciting field By embracing technology ethically and responsibly translators can contribute to a more efficient and accurate global communication landscape

i don t translate i create this is the slogan of a translation agency called sternkopf communications located in translators at this translation agency are specialized in the field of marketing and perceive creativeness their daily bread but what does this actually mean i don t translate i create undoubtedly the translation of a text from one language into another is not an easy and straightforward process on the contrary the translator needs to invest much time and one or the other headache before a target text tt finally sounds natural fluent coherent and logical for the target audience different possible translation solutions will have to be considered language as well as culture related equivalents often are not easily at hand etc would it not be pleasant if machine translation mt was there to help with this process nevertheless as promising as this may sound no machine or software developed so far is able to independently produce tts meeting the standards of marketable translations despite copious efforts to do so this just goes to show how important the human capacity of creativity in language and text production is for the translation process without human creative thinking tts would in fact truly only read like translations i e mechanical reproductions of the source text st in a different code rather than natural texts in their own right good translations however distinguish themselves by not revealing their readership that they are merely renderings of the original text hence a slogan such as i don t translate i create emphasizes the effort that is put into the translation process quite well making the customers of sternkopf communications instantly aware of the fact that their texts are in good hands and will eventually not read like mechanical translations but as if they were well composed originals yet despite the enormous importance of creativity in translating computer aided translation cat tools are being used frequently by

professional translators not to replace but to support the translator in their daily business from the 1990s onwards using cat tools has been becoming increasingly popular for the following reason they are said to help translators to achieve faster turnaround times by storing completed translations in a translation memory tm in so doing cat tools enable their users to translate in a more consistent way since they search source texts for words phrases or sentences that have already been translated before and stored in the tm so that the translator does not need to translate this text unit again from scratch accordingly this paper pursues two related purposes the first is to compare the different cat tools in their degree of usability to gain an impression of which of these translation memory solutions is perceived to meet translators technological requirements best the second purpose is to identify translators perspectives on uniformity and creativity in translations with the goal to shedding light on the question whether cat tools generally tend to positively or negatively influence the translation process on a rather linguistic than technological basis

this open access edited book attempts to break new ground in investigating multiple facets of vietnamese language education and change in global contexts engaging with global vietnam through complex lenses of language and education issues of language globalization and global identities have often been framed through the lens of hierarchical binary power relations and or through a dichotomy between hyper central languages such as english and revisualized or marginalized local language and cultures in this book this dichotomy is turned on its head by considering how vietnam and vietnamese are constructed in and outside vietnam and enacted in global spaces of classrooms textbooks student mobility community engagement curriculum and intercultural contacts vietnamese is among the world s most spoken languages and is ranked in the top 20th in terms the number of speakers yet at the same time as a peripheral or southern global language as often seen in the global north global south spectrum the dynamics of multilingual and multicultural encounters involving vietnamese generate distinctive dilemmas and tensions as well as pointing to alternative ways of thinking about global phenomena from a fresh angle rather than being outside of the global vietnamese like many other non central global languages is present in diasporas commercial and transnational structures of higher education schooling and in the more conventional settings of primary and secondary school in which visions of culture and language also evoke notions of heritage and tradition as well as bring to the fore deep seated ideological conflicts across time space communities and generations relevant to

students and scholars researching language education identity multiculturalism and their intersections particularly related to vietnam but also in southeast asia and beyond this volume is a pioneering investigation into overlooked contexts and languages from a global southern oriented perspective this book presents an eclectic collection of 15 chapters unified by an interest in developing and teaching the vietnamese language to my knowledge there has been no previous attempt to make the national language of vietnam a focus for as many perspectives as are documented in the book in this regard the book makes an original and intriguing contribution to the literature on vietnamese culture including the culture of vietnam s expanding diaspora the book is pioneering in the extent to which it draws attention to the many roles played by a national language in a nation s political social and cultural development it also documents the challenges of preserving a national language in settings where it is at risk of being marginalized it is pleasing that so many of the contributing authors are young vietnamese scholars who can provide a distinctly vietnamese perspective on concepts and practices of global significance dr martin hayden emeritus professor of higher education southern cross university australia vietnamese language education and change in and outside vietnam brings together an excellent collection of chapters that highlight the diverse and important but under explored roles vietnamese language plays in different settings within and outside vietnam the fifteen chapters of this much needed book provide unique insights into various aspects and meanings of vietnamese language collectively the volume contributes to broadening our view about the evolution and transformation of vietnamese language under the impacts of local national regional and global forces the book invites readers to engage in a reflective and intersectional approach to rethinking and re examining our understandings of the changes and developments of vietnamese language over the history of the country dr ly tran professor centre for research for educational impact redi deakin university australia and founder australia vietnam international education centre
